Friday Night Free Skate - April to June 2011

The Friday Night Free Skate continues to be popular with the demand being at its highest level for a long time. We visited different schools in the area and gave out flyers and talked about what is going on at the park and this is paying off with the increased interest.

The free skate evenings are really good and it gives the youth workers more time to chat to a lot of the young people and get to know them a bit better, which is good for the young people as they feel they have someone to talk to and listen to them other than family or parents.

The young people really enjoy these evenings and it also gives them the opportunity to come along to the Skatepark and see what other things we have on offer. More of the Freeskate young people are attending other activities run at the Skatepark.
