

Report

Homework Club - April to June 2011

The homework club has completed another interesting term.

Aims of the Homework Club

Increase confidence and self belief.

Improve literacy and numeracy skills.

Support the young people with any issues.

Build interpersonal skills through communication and teamwork.

We continue to see an improvement in some of the children and we have had positive feedback from some of the parents. We continue to provide educational

materials for those who do not have homework with them. We divide them into small groups and one of the youth workers or volunteers supervises these groups and gives help and encouragement as required. We use the second half of the session to allow the young people to be physically active on the skatepark or use some other of our sports equipment or use the Wii Sport.
